

HTML

Basic HTML

1. What is HTML?
2. What is the full form of HTML?
3. What is the difference between HTML and HTML5?
4. Write the basic structure of an HTML document.
5. What is the DOCTYPE declaration?
6. What is the difference between HTML elements and HTML tags?
7. What is an empty tag?
8. What is the difference between block-level and inline elements?
9. What is Semantic HTML?
10. What are non-semantic tags?

HTML Tags

11. What is the difference between <div> and ?
12. What is the difference between <section> and <div>?
13. When should you use the <article> tag?
14. What is the difference between <header> and <head>?
15. What is the purpose of the <footer> tag?
16. What is the use of the <nav> tag?
17. What is the <aside> tag used for?
18. What is the purpose of the <main> tag?
19. What are <figure> and <figcaption> tags?
20. What do the <details> and <summary> tags do?

HTML Forms

21. What is an HTML form?
22. What are the important attributes of a form?
23. What is the difference between the GET and POST methods?
24. What is the purpose of the <label> tag?
25. What is the difference between the placeholder and value attributes?
26. What does the required attribute do?

- 27. What is the difference between readonly and disabled?
- 28. What is a hidden input field?
- 29. What is the difference between a checkbox and a radio button?
- 30. What is the difference between <select> and <datalist>?

HTML Input Types

- 31. What are the different input types available in HTML?
- 32. How does email input validation work?
- 33. What is the purpose of the number input type?
- 34. What is the use of the date input type?
- 35. What does the color input type do?
- 36. What is the file input type used for?
- 37. What is the range input type?
- 38. How can you implement a show/hide password feature?
- 39. What does the multiple attribute do?
- 40. What are the autofocus and autocomplete attributes?

Multimedia

- 41. How do you add an image to an HTML page?
- 42. What is the purpose of the alt attribute?
- 43. Write the syntax for the <audio> tag.
- 44. Write the syntax for the <video> tag.
- 45. What is an <iframe>?

HTML Tables

- 46. What are the main HTML table tags?
- 47. What is the difference between colspan and rowspan?
- 48. What are <thead>, <tbody>, and <tfoot>?

Questions (Most Frequently Asked)

- 51. What is a meta tag?
- 52. What is UTF-8 character encoding?

53. How do you add a favicon to a website?
54. How do you create an SEO-friendly HTML page?
55. What is web accessibility (ARIA)?
56. What is the difference between Canvas and SVG?
57. What are data-* attributes?
58. What is the difference between defer and async?
59. What is the difference between placing the <script> tag in the <head> and at the end of the <body>?
60. How do you write comments in HTML?

CSS

Basic CSS

1. What is CSS?
2. What is the full form of CSS?
3. What are the different ways to apply CSS?
4. What is the difference between Inline, Internal, and External CSS?
5. What are the advantages of using CSS?
6. What are CSS selectors?
7. What are the different types of CSS selectors?
8. What is the difference between id and class selectors?
9. What is the Universal Selector (*)?
10. What is the Group Selector?

CSS Properties

11. What is the Box Model?
12. What is the difference between margin and padding?
13. What is the difference between border and outline?
14. What is the difference between width and max-width?
15. What is the difference between height and min-height?
16. What is the box-sizing property?

- 17. What is the difference between display: none and visibility: hidden?
- 18. What is opacity?
- 19. What is the overflow property?
- 20. What is the z-index property?

Positioning

- 21. What are the different values of the position property?
- 22. What is the difference between relative and absolute positioning?
- 23. What is fixed positioning?
- 24. What is sticky positioning?
- 25. What is the difference between static and relative?
- 26. What is the difference between absolute and fixed?
- 27. How does z-index work with positioned elements?
- 28. What is the stacking context?
- 29. How do you center an element using CSS?
- 30. How do you center an element using Flexbox?

Flexbox

- 31. What is Flexbox?
- 32. What is the difference between Flexbox and Grid?
- 33. What is display: flex?
- 34. What is justify-content?
- 35. What is align-items?
- 36. What is flex-direction?
- 37. What is flex-wrap?
- 38. What is the gap property?
- 39. What is flex-grow, flex-shrink, and flex-basis?
- 40. How do you create a responsive layout using Flexbox?

CSS Grid

- 41. What is CSS Grid?
- 42. What is the difference between Grid and Flexbox?
- 43. What is grid-template-columns?

- 44. What is grid-template-rows?
- 45. What is the fr unit?
- 46. What is grid-gap (or gap)?
- 47. What is grid-area?
- 48. How do you create a responsive grid layout?

Responsive Design

- 49. What is Responsive Web Design (RWD)?
- 50. What are Media Queries?
- 51. What is the mobile-first approach?
- 52. What is the viewport meta tag?
- 53. What are CSS units (px, %, em, rem, vh, vw)?
- 54. What is the difference between em and rem?
- 55. What is the difference between vh and vw?

Animation & Transition

- 56. What is the difference between transition and animation?
- 57. What is @keyframes?
- 58. What are CSS transforms?
- 59. What is the difference between translate(), rotate(), scale(), and skew()?
- 60. What are CSS pseudo-classes and pseudo-elements?

JAVASCRIPT

JavaScript Basics

1. What is JavaScript?
2. What is the difference between JavaScript and ECMAScript?
3. What are the features of JavaScript?
4. Is JavaScript a compiled or interpreted language?
5. What are the data types in JavaScript?
6. What is the difference between primitive and non-primitive data types?
7. What is the difference between null and undefined?
8. What is the difference between == and ===?
9. What is typeof in JavaScript?
10. What is NaN?

Variables

11. What is a variable?
12. What is the difference between var, let, and const?
13. What is variable hoisting?
14. What is the temporal dead zone (TDZ)?
15. What is variable scope?
16. What are global, local, and block scope?
17. Can you reassign a const variable?
18. Can you redeclare variables using let or const?
19. What are JavaScript naming rules for variables?
20. What is variable shadowing?

Operators

21. What are arithmetic operators?
22. What are comparison operators?
23. What are logical operators?
24. What is the ternary operator?
25. What is the nullish coalescing operator (??)?
26. What is the optional chaining operator (?.)?

- 27. What is the spread operator (...)?
- 28. What is the rest operator (...)?
- 29. What is the difference between spread and rest operators?
- 30. What is the delete operator?

Functions

- 31. What is a function?
- 32. What is the difference between function declaration and function expression?
- 33. What are arrow functions?
- 34. What is the difference between regular functions and arrow functions?
- 35. What are callback functions?
- 36. What are higher-order functions?
- 37. What are anonymous functions?
- 38. What are immediately invoked function expressions (IIFE)?
- 39. What are default parameters?
- 40. What are rest parameters?

Arrays

- 41. What is an array?
- 42. What is the difference between map() and forEach()?
- 43. What is the difference between filter() and find()?
- 44. What is the difference between slice() and splice()?
- 45. What is the difference between push() and pop()?
- 46. What is the difference between shift() and unshift()?
- 47. What is reduce()?
- 48. What is some() and every()?
- 49. What is includes()?
- 50. How do you remove duplicate values from an array?

Objects

- 51. What is an object?
- 52. What is the difference between dot notation and bracket notation?
- 53. What is object destructuring?
- 54. What is object cloning?

- 55. What is the difference between shallow copy and deep copy?
- 56. What is the `this` keyword?
- 57. What is `Object.keys()`?
- 58. What is `Object.values()`?
- 59. What is `Object.entries()`?
- 60. What is object freezing (`Object.freeze()`)?

DOM (Document Object Model)

- 61. What is the DOM?
- 62. How do you select elements in JavaScript?
- 63. What is the difference between `getElementById()` and `querySelector()`?
- 64. How do you add an event listener?
- 65. What is event bubbling?
- 66. What is event capturing?
- 67. What is event delegation?
- 68. What is the difference between `innerHTML`, `innerText`, and `textContent`?
- 69. How do you create and remove HTML elements using JavaScript?
- 70. How do you prevent the default behavior of an event?

Frequently Asked Questions

- What is hoisting?
- What is a closure?
- What is lexical scope?
- What is a promise?
- What are callbacks, promises, and `async/await`?
- What is the event loop?
- What are synchronous and asynchronous programming?
- What is the call stack?
- What is callback hell?
- What is JSON?
- What is `localStorage`?
- What is `sessionStorage`?
- What are cookies?
- What is debouncing?

Must-Prepare JavaScript Interview Questions

1. What is the difference between var, let, and const?
2. What is the difference between == and ===?
3. What are closures?
4. What is hoisting?
5. What is the difference between map(), filter(), and reduce()?
6. What is the difference between null and undefined?
7. What is the difference between synchronous and asynchronous JavaScript?
8. What are promises and async/await?
9. What is the event loop?
10. What is the this keyword?

REACT.JS

React Basics

1. What is React.js?
2. What are the features of React?
3. What are the advantages of React?
4. What is the difference between React and JavaScript?
5. What is the difference between React and Angular?
6. What is the Virtual DOM?
7. How does the Virtual DOM improve performance?
8. What is JSX?
9. What are the rules of JSX?
10. What is Babel in React?

Components

11. What is a component in React?
12. What are the different types of components?
13. What is the difference between Functional and Class Components?

14. Why are Functional Components preferred?
15. What is a reusable component?
16. What are props in React?
17. What is the difference between props and state?
18. Can props be modified?
19. What is prop drilling?
20. How can prop drilling be avoided?

State & Events

21. What is state in React?
22. How do you update state?
23. Why should state not be updated directly?
24. What is the difference between state and variables?
25. What is event handling in React?
26. How do you pass parameters to an event handler?
27. What is controlled component?
28. What is uncontrolled component?
29. What is two-way data binding?
30. What is lifting state up?

React Hooks

31. What are React Hooks?
32. What is the useState Hook?
33. What is the useEffect Hook?
34. What are the dependency array options in useEffect?
35. What is the difference between useEffect and useLayoutEffect?
36. What is useRef?
37. What is useMemo?
38. What is useCallback?
39. What is useContext?
40. What are custom hooks?

Routing

- 41. What is React Router?
- 42. What is BrowserRouter?
- 43. What is the difference between Route and Routes?
- 44. What is Link?
- 45. What is NavLink?
- 46. What is useNavigate?
- 47. What are URL parameters?
- 48. What is useParams?
- 49. What is nested routing?
- 50. What is a protected route?

API & Forms

- 51. How do you fetch API data in React?
- 52. What is Axios?
- 53. What is the difference between Fetch API and Axios?
- 54. How do you handle loading state?
- 55. How do you handle errors in API calls?
- 56. How do you submit a form in React?
- 57. What is form validation?
- 58. What is conditional rendering?
- 59. What is list rendering?
- 60. Why is the key prop important?

Performance & Advanced Concepts

- 61. What is React Fragment?
- 62. What is React.memo()?
- 63. What is lazy loading in React?
- 64. What is Suspense?
- 65. What is code splitting?
- 66. What is reconciliation?
- 67. What is the React lifecycle?
- 68. What is Context API?

69. What is Redux, and when would you use it?

70. What is the difference between Context API and Redux?

Frequently Asked Questions

- What is the latest version of React?
- What is npm?
- What is npx?
- What is Vite?
- What is Create React App (CRA)?
- What is package.json?
- What is package-lock.json?
- What is node_modules?
- What is the difference between npm install and npm update?
- What is StrictMode?
- What is hydration in React?
- What are Higher-Order Components (HOC)?
- What are render props?
- What is portal in React?
- What is error boundary?
- What is React Developer Tools?
- What is server-side rendering (SSR)?
- What is client-side rendering (CSR)?
- What is Next.js?
- What is hydration mismatch?
